

AYKHAN SALMANOV

Aspiring Software Developer

+44 726 253 4028 | AYKHANSALMANOV@gmail.com | [LinkedIn](#) | [GitHub](#) Authorized to work in the UK without sponsorship

ABOUT ME

I'm an enthusiastic Computer Science student at the University of Westminster with a strong passion for software development and testing. I've gained hands-on experience in Python, Java, C++, and SQL through various projects and academic achievements. I thrive in collaborative environments and am dedicated to delivering innovative solutions. I'm now seeking a software development apprenticeship to refine my skills and contribute to impactful projects.

SKILLS

Programming Languages: Python, Java, JavaScript, C++, C, Lua, HTML/CSS, Assembly, SQL

Technologies: Node.js, MongoDB, Flask, Bootstrap, Git, MATLAB/Simulink

Software Testing: Unit Testing, Debugging, Vulnerability Assessment

Certifications: Yandex Python Certificate ; Coursera Plus Certificate - Java Programming

WORK EXPERIENCE

Advance Games, Internship
August 2022 - present

Technical Administrator & QA Tester

- Led a team of testers to investigate user reports and maintain platform integrity
- Developed Lua scripts to automate testing of new updates and identify vulnerabilities
- Reduced bug resolution time by 40% through implementation of structured testing protocols
- Managed user complaint systems and coordinated with development team for issue resolution

PROJECTS

Assembly Language Programming | 8086 Assembly [View Project on GitHub](#)

- Developed arithmetic computation systems for complex mathematical operations
- Implemented student record processing system with efficient data structure management
- Created polynomial calculation program handling multiple variables and exponentiation

Maze Generator & Solver | Python, Algorithms [View Project on GitHub](#)

- Developed a maze generation algorithm with customizable parameters
- Implemented Dijkstra's algorithm for pathfinding optimization
- Created visualizations for maze generation and solving process

Mystery World Game | C++ [View Project on GitHub](#)

- Designed and implemented entity movement system with distinct behavior patterns
- Created efficient collision detection and game state management
- Developed modular codebase for easy feature expansion

Portfolio Website | Flask, Bootstrap, HTML/CSS, JavaScript [View Project on GitHub](#)

- Developed responsive website using Flask framework and Bootstrap
- Implemented dynamic content management system
- Created clean, modern UI design with intuitive navigation

Flappy Bird Clone | Python, Pygame [View Project on GitHub](#)

- Implemented physics-based gameplay mechanics and collision detection
- Created smooth animation system and sprite management
- Designed scoring system and difficulty progression

Two-Tank Liquid Level Control System | MATLAB/Simulink | [Publication](#)

EDUCATION

University of Westminster, London
2024 - 2026

Kaplan International College London
2023-2024

BSc, Computer Science

- Maintaining consistent academic excellence with all assessments scored above 80%
- Mastering advanced Object-Oriented Programming concepts using Java
- Developing expertise in SQL database design and implementation
- Conducting complex system modeling and control using MATLAB/Simulink
- Participating in collaborative software development projects

BSc (Hons) Computer Science

- Achieved 91% average across all modules
- Received merit-based scholarship for Westminster University
- All projects scored above 80%
- Excellence in programming and system design
