Professional Profile

A BSc in Software Engineering graduate who is poised to use both skillset and academic qualifications to further his career within software development industry. Passionate about functional programming, mathematics, and the appliance of technological solutions to challenges of the modern world. Looking to excel at already obtained skills in a professional environment and opportunity to contribute to solving complex problems.

Core Skills

- Scala (Cats, Cats Effect, fs2, http4s, Smithy4s)
- Amazon Web Services
- Jenkins and Github Actions CI/CD
- Event Driven Architecture and REST API's
- Infrastructure as Code (Terraform)
- Docker
- GraphQL
- Test Driven Development
- SQL and NoSQL Databases
- Java
- Jira
- Python
- JavaScript (ReactJS)
- HTML5 / CSS

Work Experience

ITV Services Limited

201 Wood Lane, London, W12 7RU

Junior Software Engineer (August 2023 - Ongoing)

Worked on developing new features for newly created service responsible for ingesting and tracking deliverables such as images, metadata and legal forms from independent producers, allowing them to publish their content on ITV platforms with over ten thousand delivered items. Led efforts to streamline and automate the onboarding process for new productions, mitigating possible human error and greatly improving the time to market for new content.

The services consist of several modular monoliths designed to orchestrate events ingested from neighbouring services by leveraging a suite of communication protocols, including REST APIs, RabbitMQ Events, and SQS Events, serving as the backbone of the user interface used by internal and external users.

- Scala (Cats, Cats Effect, Weaver, smithy4s, http4s fs2, ScalaJS)
- Amazon Web Services (Lambda, SQS, SNS, S3, API Gateway, EKS)
- GraphQL
- Terraform
- Docker
- Jenkins
- GitHub Actions
- PostgreSQL
- Prometheus

Disney Streaming

117 Waterloo Rd, London, SE1 8UL

Software Engineering Intern (August 2022 – August 2023)

Wrote an internal tool that enables business stakeholders to rapidly compare maturity rating systems across Disney streaming products. The tool consists of an HTTP API backend, built with Smithy IDL and deployed on AWS ECS, and a browser UI, built with ReactJS. In future, the API server will provide service to multiple clients

Learned about the Test Pyramid, API design, Continuous Integration, Infrastructure as Code, Interface Description Languages and Single Page Applications.

- Scala (Cats, Cats Effect, Weaver, smithy4s, http4s)
- JavaScript (ReactJS)
- Amazon Web Services
- Terraform
- Docker
- Jenkins CI /CD

Education

University Of Westminster

Bachelor of Engineering First Class Honours – BEng, Computer Software Engineering

September 2020 – August 2023

Modules:

- ❖ Software Development I (Python) – 93%
- ❖ Mathematics for Computing – 94%
- ❖ Trends in Computer Science – 65%
- ❖ Computer Systems Fundamentals – 92%
- ❖ Software Development II (Java) – 72%
- ❖ Web Design and Development (HTML5, CSS, JavaScript) – 71%
- ❖ Object Oriented Programming (Java) – 94%
- ❖ Database Systems (SQL, XML) – 84%
- ❖ Algorithms: Theory, Design, and Implementation (Java) – 90%
- ❖ Business Analytics (Excel , R) – 72%
- ❖ Machine Learning and Data Mining (R) – 59%
- ❖ Software Development Group Project (Java) – 72%
- ❖ Concurrent Programming (Java) – 69%
- ❖ Formal Methods (AtelierB, ProB) – 71%
- ❖ Advanced Analytics (Excel , R) – 72%
- ❖ Cyber Security – 70%
- ❖ Final Year Project: Online IDE to develop Application Topology descriptions in TOSCA standard (Python , JavaScript , Cloud Computing) – 75%

ZSZ nr 1 im. Marii Skłodowskiej-Curie (Technical Collage)

IT technician , Information Technology

September 2012 – May 2016

Certificates

IELTS Academic 7/9

Issued March 2020

Functional Programming Principles in Scala, EPFL (École polytechnique fédérale de Lausanne)

Issued November 2022

Functional Program Design in Scala, EPFL (École polytechnique fédérale de Lausanne)

Issued November 2022

Introduction to Cloud Computing, IBM

Introduction to DevOps, IBM

Introduction to Containers w/ Docker, Kubernetes & OpenShift, IBM

Issued October 2022
